

At Expedition Log Homes, every home is custom designed and tailor-made to your specifications. The design ideas presented here are meant to spark your imagination. As you study the designs, pick out your favorite elements. Do you see any recurring themes? Are there any particular elements that you're drawn to time and again? We are here to help you combine the floor-plan flow your lifestyle demands with the architectural elements your imagination embraces.

## PINE VALLEY

TOTAL SQ. FT. - 1,784 sq. ft.

## CUSTOM DESIGN TIPS

The example above shows how you can take a common $\log$ home cabin design (The Shoreline) and reduce the over-all square footage to meet your budget requirements, while maintaining the general flow and character of the home.

In the first example, the width of the home allows for a straight stairway run and abundant closet space. Reducing the size of the home while keeping the important elements does require downsizing storage, adding a turn in the staircase (so that we maintain adequate "head-room"), and reducing the overall size of each room.

As you study the design ideas in this section, notice how the change from a shed porch to a small gable porch or different window styles can affect the outside appearance of the home. Apply the elements that you find visually appealing, with the floorplan design that meets your lifestyle and budget requirements. It's a journey all log home owners take, and we're here to guide you along the way.

[^0]:    CUSTOM DESIGN TIPS
    The Summit example maintains the general look of the outside (front porch and dormers, offset attached garage) while drastically altering the interior flow. Keep in mind that each design choice you make will affect budget, aesthetics, comfort and workability.

    This example illustrates several different design choices. For budget purposes, size reduction is accomplished by eliminating the center gable in the great room/foyer area. Cost is also reduced by deleting corners on the home.
